
When to buy

Posted by 67fastback - 2008/05/14 15:00

I've heard on the news that the market seems to be improving. Does this mean prices are on the way back up? Is now a good time to buy?

B) OH YEAH!!!

Watching the news right now is always a bit scary. Fox 13 tonight featured a piece on the economy and it showed Utah way above the rest of the nation. We have had a 2% job increase while the rest of the nation is at 0.3%. In my opinion that is awesome. We of course are going to be affected by the rest of the nation but now is the time to buy. We can't see the interest rates going any lower and hey the weather is changing and it is time to get out and save some of these sellers. Sellers want out and it will be a win-win.

Ya its right time to buy.But be careful during investing in this.First check all market trend then proceed to buy.There are different sellers. Some of them may be fake.First select some sellers then choose one of them.
Thanks!
